

POSTDOCTORAL FELLOWSHIPS

Neurobiology of Overgrowth syndromes

Two Postdoctoral positions are available to study the molecular mechanisms controlling organismal hypergrowth in the context of rare genetic diseases (*Nat. Cell Biol.*, 7, 286; *Cell Metabolism*, 5, 476; *J. Exp.Med*, 211, 2249; *EMBO J.*, 36, 736, *Nature Communications*, 11, 3200). Research interests in signal transduction, neurobiology or molecular biology are required. The project is funded by the French National Agency and Hospital-University Research for 3 years with possibility of extension.

The lab is located in the heart of Paris, in an international and renowned campus of medical research with state-of-the-art facilities: <https://www.institut-necker-enfants-malades.fr/>

Applications including a CV and the names of three referees should be sent to:

Mario Pende,

Inserm U1151, 160 rue de Vaugirard, 75015 Paris, France,

e-mail: mario.pende@inserm.fr
